Here is the Borehole Geophysics report without the video. The video is what is too large to email.

The FTP page does not allow me to register. Is there another option for the borehole geophysics report? I have attached the GW data reports. The well designation of interest is GW-10.

Marvin -

Just following up on the below. Please let me know whether our link will work for transmitting the additional data.

Many thanks,

Leigh Bausinger

Subject: Wilcox Oil Superfund Site

Good afternoon Marvin -

I am a colleague of Ross Lewin's, who I understand you've spoken with regarding the well located on the Church property within the Wilcox Oil Superfund Site in Bristow, Oklahoma. I understand from Ross that EPA has gathered certain sampling data from that well, but it is too large to transmit via e-mail.

To facilitate transmission, we have arranged for a secure FTP site which you can use to transmit that information. Please access the site via the link below. It does require registration of your email address, so please let me know if that's a problem.

<https://securefiles.dbr.com/ok/drlogin.do?dt=A0534759708&ci=a8075c8gef8kjdrjdrbqtkb20>

We have also reviewed the sampling reports that you provided. It appears that those reports relate to more than one sample - would it be possible for EPA to provide a key that identifies what the sample IDs in those reports signify?

Please don't hesitate to give me a call with any questions.

Many thanks,

Leigh Bausinger
